Joel Agundez

Frontend Developer

MY HISTORY

Hi, my name is Joel. Over the past three years, I have been working in business companies to create software solutions that enhance productivity through process automation. I am a proactive person who strives to improve my professional skills every single day.

PROFECIONAL OBJECTIVE

Passionate about developing innovative products with growing teams and working on projects that challenge my skills, allowing me to scale them while providing effective and functional solutions to optimize company workflows and increase performance.

EXPERIENCE

Software Developer at AGCE (2022-2023)

- Designed and developed a landing page to establish the business's online presence.
- Built a e-commerce platform integrated with a secure payment gateway, enabling seamless online shopping

Fullstack Developer at Inxeniux (2023 - Present)

Overview:
- Development for a consultancy, delivering diverse web and mobile solutions tailored to client requirements.

Responsibilities:
- Developed and deployed projects such as event management apps, CRM systems, credit and collections platforms, and automation tools for billing, inventory, and purchases.
- Actively collaborated with cross-functional teams to meet project objectives and deliver quality solutions on time.
